Feedback *pro forma*

Instructions to Steering Committee

We welcome your feedback and comments as well as suggestions for actions and research questions and an indication of their level of importance in improving cancer control outcomes. If you are recommending an action, please indicate the evidence to support your recommendation.

Please provide your feedback within the following sections (attach additional pages if necessary).

1. Are there any key issues that have been overlooked in the summary?

2. Please specify which issues you consider to be of high priority.

3. Are there any particular actions or research questions you feel are of a higher priority?

4. Are you aware of any key evidence that has been omitted?

5. Do you have any other comments or recommendations?
